

Eureka A-Frame: Tent set-up and take-down

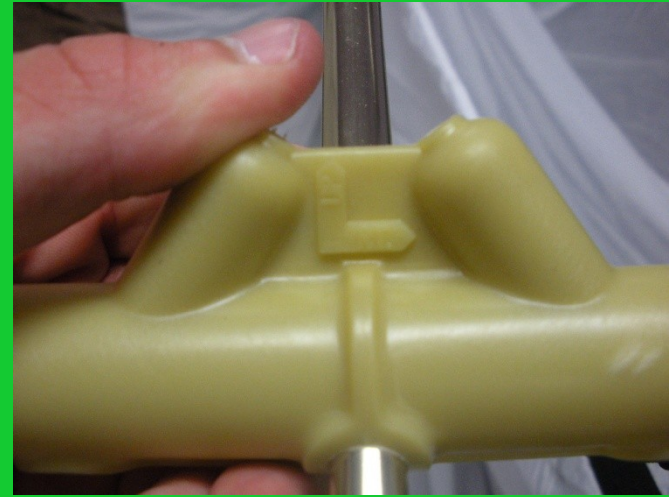

Troop 407
7/11/09

Set Up

Step 1: Insert back bone pole of tent into the white “bones” on both ends of the tent.

Make sure the bone is facing the proper direction (Reads ‘Up and Right’)

Step 2: Insert all 4 legs into the bones.

Insert pins into the legs AFTER you put the legs into the bone

This is what the tent should look like so far.

Step 3: Pull both bungees over the bones.

Step 4: Clip clasps onto the legs.

Step 5: Put single poles onto both ends of the tent.

Step 6: Pull rain fly over the tent and put hooks into noses of single poles on both ends of the tent.

Put hooks into rings at the corners of the tent AFTER completing Step 6

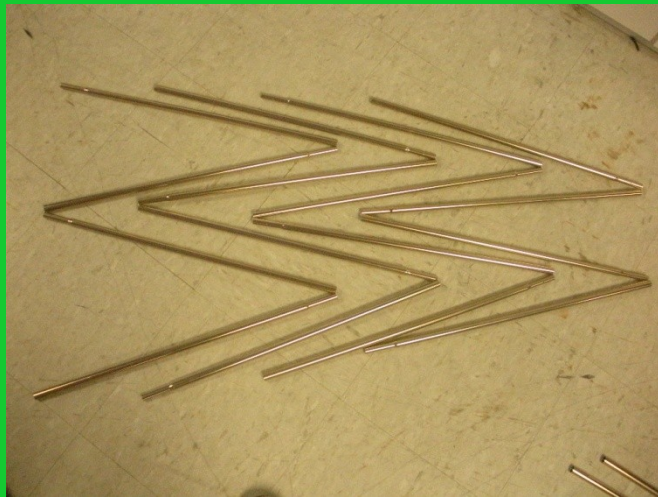

Step 7: Clip ALL 4 clasps underneath the fly and connected to the tent.

Step 8: Stake down the corners and the 4 bungees attached to the fly.

Poles

4 poles that are 4
poles long (legs)

1 pole that is 3 poles
long (back bone)

2 single
poles (rain
fly)

Take Down

Step 1: Start with a fully collapsed and flat tent. Make sure the BOTTOM zipper only is unzipped $\frac{1}{2}$ way. Pull both bungees and bones over to one side of the tent and lay flat.

Step 2: Fold one side of the tent to the middle. *Do not fold tent in half*

Step 3: Fold other side of tent to the middle.

Step 4: NOW fold the tent in half.

Step 5: Fold rain fly in half 3 times. *Make sure the shiny side is on the inside during the 1st fold and that you fold it hot dog style (Side to side, not front to back)*

Step 6: Fold the fly once hamburger style so that it is $\frac{1}{2}$ the length it was when you last folded it.

Step 7: Place the folded fly on top of the folded tent. Make sure they are both facing in such a fashion that air can escape when they are rolled up.

Step 8: Use the poles in the pole bag as something to roll the tent around. Roll the tent tightly and leave the pole bag in the center of the roll. Place tent into bag.

Extra Info

Make sure the bottom zipper is $\frac{1}{2}$ way unzipped when you fold and roll your tent

Neatly stuff tarp into bag alongside the tent

Tie the bag closed with a slip knot
